## SKILLS

### FRONTEND

HTML<sup>5</sup>

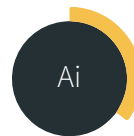

CSS<sup>3</sup>

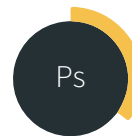

JS<sup>ES6</sup>

Web Development work area in which I have more competencies and experience. I have worked with several libraries and resources like BackboneJS, SASS, Gulp, LeafletJS and I can learn to work with new ones.

### DESIGN

Ai

Ps

My knowledge in this area is self-taught and responds to the interest of having some control of all phases of web development and especially to be able to build HTML/CSS templates based on Adobe Illustrator and Photoshop documents.

### BACKEND

php

python

WP<sup>4</sup>

My experience in Backend is based on the FullStack jobs I have carried out and on the support to Backend team in my last experience before working as a Freelance. When it comes to making websites without great particularities on the server side, I choose Wordpress as CMS.
